CONTENTS

Research Papers

An inverse method for estimating soil core water characteristics
K. Zayani, J. Tarhouni (Tunis, Tunisia), G. Vachaud (Grenoble, France) and M. Kutilek (Prague, Czechoslovakia) 1
A comparison of short-term measurements of lake evaporation using eddy correlation and energy budget methods
D.I. Stannard and D.O. Rosenberry (Denver, CO, U.S.A.) 15
Forest hydrologic research in China
Y. Xinxiao (Beijing, People's Republic of China) 23
Modeling daily rainfall using a semi-Markov representation of circulation pattern occurrence
A. Bardossy and E.J. Plate (Karlsruhe, F.R.G.) 33
Relation between infiltration and stone cover on a semiarid hillslope, southern Arizona
A.D. Abrahams (Buffalo, NY, U.S.A.) and A.J. Parsons (Keele, U.K.). 49
On gaseous diffusion of CO_2 in the unsaturated zone
S. Laursen (Lyngby, Denmark). 61
An approach to the rationalization of streamflow data collection networks
D.H. Burn and I.C. Goulter (Winnipeg, Man., Canada) 71
Long-term annual and seasonal trends in surface salinity of San Francisco Bay
J.P. Fox, W.J. Miller (Berkeley, CA, U.S.A.) and T.R. Mongan (Sausalito, CA, U.S.A.) 93
The temperature dependence of ponded infiltration under isothermal conditions
J. Constantz and F. Murphy (Menlo Park, CA, U.S.A.) 119
An evaluation of procedures to estimate monthly precipitation probabilities
D.R. Legates (Norman, OK, U.S.A.) 129
Surface runoff and soil water percolation as affected by snow and soil frost
H. Johnsson and L.-C. Lundin (Uppsala, Sweden) 141
Comparative analysis of several conceptual rainfall–runoff models
M. Franchini and M. Pacciani (Bologna, Italy) 161
Adaptive prediction of hydrologic series by Walsh–Kalman model
Z. Şen (Istanbul, Turkey) 221
The influence of macropores on runoff generation from a hillslope soil with a contrasting textural class
K.R.J. Smettem, B.G. Richards (Glen Osmond, S.A., Australia), D.J. Chittleborough and F.W. Leaney (Adelaide, S.A., Australia) 235
Hydrograph separation: a comparison of geochemical and isotopic tracers
C. Wels (Peterborough, Ont., Canada), R.J. Cornett (Chalk River, Ont., Canada) and B.D. Lazerte (Dorset, Ont., Canada). 253
Finite-element method for the solution of the Saint Venant equations in an open channel network
R. Szymkiewicz (Gdansk, Poland) 275
Bias error in maximum likelihood estimation
S.P. Koch (Houston, TX, U.S.A.). 289
Spectral response of suspended sediments in water under controlled conditions
V.K. Choubey and V. Subramanian (New Delhi, India) 301
Travel time of runoff crests in Israel
A. Ben-Zvi (Jerusalem, Israel), S. Massoth (Tel-Aviv, Israel) and A.P. Schick (Jerusalem, Israel) 309
Analysis of flow into draintile in three-dimensional flow field
G. Hazenberg and U.S. Panu (Thunder Bay, Ont., Canada) 321

A comparison of index-sequential and AR(1) generated hydrologic sequences
D.R. Kendall and J.A. Dracup (Los Angeles, CA, U.S.A.) 335
Determination in real time of the reliability of radar rainfall forecasts
T. Denoeux (Noisy-le-Grand, France), T. Einfalt and G. Jacquet (Versailles, France) . 353
Numerical simulation of infiltration and solute transport in an S-shaped model basin by a boundary-fitted grid system
T. Kinouchi, M. Kanda and M. Hino (Tokyo, Japan) 373
The effect of transverse dispersion on solute transport in soils
F.J. Leij and J.H. Dane (Auburn, AL, U.S.A.). 407

Book reviews
Channelized Rivers, Perspectives for Environmental Management
D. Stephenson (Johannesburg, South Africa) 423
Isotope Techniques in the Study of the Hydrology of Fractured and Fissured Rocks
G.H. Davis (Silver Spring, MD, U.S.A.). 423
Announcement. 427
Corrigendum 429
Erratum. 429
